Section Analysis

Percent Correct

System Architecture	62%
Linux Installation and Package Management	81%
GNU and Unix Commands	69%
Devices, Linux Filesystems, Filesystem Hierarchy Standard	66%

Thank you for taking LPI's certification exam. Scores on the exam are scaled so the range is from 200 - 800.

Passing a single exam does not signify completion of an LPI certification. Certification is awarded after passing all required exams for a particular level. After passing the required exams, you will receive a printed certificate indicating that you hold the designated certification level.

Employers and others considering the value of professional certification are encouraged to review the LPI website or to contact LPI for more information. LPI recommends that achievement of professional certification be considered as one of many factors in evaluating the competency of an individual. Consideration should be given to the amount of time that has passed since the candidate completed an exam or certification in order to assess the currency of a candidate's skills.

For more information about LPI and the Linux certification programs, write to Linux Professional Institute Inc., 1024 Iron Point Rd., Folsom, California, U.S.A. 95630 or info@lpi.org.
